Pankaj Kumar

.NET Full Stack Developer

Zirakpur, Punjab, India · kp8613765@gmail.com · linkedin.com/in/pankaj-kumar-63820b29a · github.com/Pankajkapoor123

SUMMARY

.NET Full Stack Developer building web applications and RESTful APIs with ASP.NET Core, Angular, PostgreSQL and SQL Server. Experienced in healthcare, AI-assisted report analysis, inventory and logistics systems, with a focus on validation, access control and data integrity.

EXPERIENCE

.NET Full Stack Developer · Coretegra Technologies Pvt Ltd — Apr 2024 — Present

Zirakpur, Punjab

- Built the HIMS backend (.NET Core + Angular) covering patient records, prescriptions, admissions and billing; contributed to ABHA M1/M2/M3 modules for health-data interoperability.
- Built responsive Angular frontends for HIMS and Authentiko: reusable components, reactive forms with validation, route guards and HTTP interceptors for JWT auth, integrated with .NET APIs through RxJS.
- Designed the SNEVVA medical report-processing pipeline: PDF/OCR extraction, knowledge-base matching, reference-range validation and AI fallback for uncertain values, on AWS S3, CloudFront and SQS.
- Delivered the complete backend for Navitra, a school transport platform serving web and mobile clients from one ASP.NET Core Web API on PostgreSQL.
- Built MIMS solo, end to end, on ASP.NET Core MVC and SQL Server — models, views, controllers and database — with multi-level approvals and low-stock alerts.
- Built Authentiko: secure document storage on S3, SFTP-based bank file workflows and shipment tracking.

.NET Full Stack Trainee · CS Infotech — Sep 2023 — Mar 2024

Chandigarh

- Built an e-commerce platform with ASP.NET Core MVC and Entity Framework, including authentication, order management and payment gateway integration.
- Optimized database queries to cut page load times and server load.

KEY PROJECTS

Hospital Management System (HIMS) — Patient lifecycle from registration to discharge: appointments, clinical records, prescriptions, beds, lab, billing and ABHA M1–M3 modules. .NET Core Web API · Angular · PostgreSQL · EF Core

SNEVVA — Wellness app on Google Play with tracking, vitals, AI health companion and AI lab-report analysis. *My scope:* the report-analysis backend — extraction, validation, structured insights. .NET 8 · PostgreSQL + pgvector · OCR · LLM · AWS

Navitra — School Transport Management — Complete backend for web and mobile apps: students, vehicles, drivers, routes and trips. ASP.NET Core Web API · EF Core · PostgreSQL

Medicine Inventory Management System (MIMS) — Multi-office medicine stock with approvals and low-stock alerts; built solo, full stack. ASP.NET Core MVC · Razor · SQL Server

Authentiko — Secure documents, bank file transfers and logistics tracking. .NET Core · Angular · PostgreSQL · AWS S3 · SFTP

SKILLS

Backend	C#, .NET 8, ASP.NET Core Web API, ASP.NET Core MVC, Entity Framework Core, REST APIs, JWT, RBAC
Frontend	Angular, TypeScript, RxJS, Reactive Forms, Routing & Guards, HTTP Interceptors, Responsive Design, HTML5, CSS3
Data	PostgreSQL, SQL Server, pgvector
Cloud	AWS S3, CloudFront, SQS, SFTP
AI & documents	LLM integration, OCR, PDF parsing, knowledge-base matching, output validation
Tools	Git, Swagger / OpenAPI, Postman, ABHA / ABDM, payment gateways

EDUCATION

Bachelor of Computer Applications (BCA) · Lovely Professional University — 2025 — Present

Diploma in Computer · Sejal Education Center, Baijnath — 2020
