Objective

.NET Full Stack Developer with experience in building web apps, RESTful APIs using ASP.NET Core, Angular, and SQL Server. Strong in problem-solving and agile collaboration.

Experience & Key Projects

- **Coretegra Technologies Pvt Ltd** *April 2024 – Present*
  .NET Full Stack Developer Zirakpur, Punjab

  Medicine Inventory Management System (MIMS)
  Tech: ASP.NET MVC, SQL Server

  - Automated inventory workflows, reducing manual effort and minimizing operational errors.
  - Designed and implemented multi-level approval workflows and role-based access control across multiple offices.
  - Implemented real-time low stock alerts, triggering automatic notifications when inventory levels fall below threshold.
  - Improved data accuracy and streamlined inventory tracking through centralized system design.

  Hospital Management System (HIMS)
  Tech: .NET Core, Angular, PostgreSQL

  - Developed full-stack hospital management system handling patient registration, appointment scheduling, and admission/discharge workflows, reducing manual administrative effort.
  - Implemented doctor modules for managing vitals, prescriptions, and clinical records, improving diagnosis accuracy and treatment tracking.
  - Built billing system including consultation fees, test records, and automated bill generation, streamlining billing operations and reducing errors.
  - Designed patient lifecycle management covering admitted patients, bed and room allocation, and staff coordination, optimizing resource utilization and hospital operations.
  - Integrated ABHA-compliant modules (M1, M2, M3) enabling standardized healthcare processes and improving inter-department data flow.

  Authentiko (Secure File, Payment & Transport Management System)
  Tech Stack: .NET Core, Angular, AWS S3, PostgreSQL, SFTP

  - Designed and developed an enterprise-grade system combining file management, payment processing, and transport operations across multiple user roles.
  - Built a secure file manager with encrypted storage and controlled access, ensuring safe handling of sensitive documents.
  - Implemented payment workflow where files are securely transferred to bank systems for processing and reconciliation, reducing manual intervention.
  - Integrated AWS S3 and SFTP for secure, scalable, and reliable file storage and transfer.
  - Developed transport management module covering vehicle management, driver assignment, and end-to-end tracking from pickup to delivery, improving logistics visibility.
  - Enabled real-time tracking and status updates for shipments, enhancing operational control and reducing delays.

Education & Certifications

- **Lovely Professional University** *2025 – Present*
  Bachelor of Computer Applications (BCA), Distance Jalandhar, Punjab
- **Sejal Education Center** *2020*
  Diploma in Computer Applications Baijnath, Himachal Pradesh
- **CS Infotech** *2023*
  Industrial Training in .NET Full Stack Development (6 Months) Chandigarh

Skills

Backend: ASP.NET Core, ASP.NET MVC, Web API, Entity Framework
Frontend: Angular, TypeScript, HTML/CSS
Database: SQL Server, PostgreSQL
Tools: Git, Postman, Swagger
Cloud: AWS S3
